The Cadillac Northstar V-8 Anthony Young 2017-02-02 Cadillac has had a long history in the automotive marketplace as General Motors' luxury car division. During the 1980s, Cadillac's management wanted to reestablish the brand as a leader in sophistication, innovation, refinement and prestige. Engineers conceived a new dual-overhead cam, four-valve-per-cylinder V-8 engine—the Northstar. This power plant was the heart of Cadillac's Northstar System, which included a greatly improved suspension and braking system. The division redesigned its entire line to incorporate these new technologies for the 1990s and beyond. The Northstar was the last engine designed and built by Cadillac before the 2005 establishment of GM Powertrain, which took over engine design for all GM divisions. This history of the Northstar V-8 and the cars it powered covers the first generation front-wheel drive Northstar, the second generation rear-wheel drive model, and the supercharged version, along with racing history and the most collectible Northstar-powered Cadillacs.

Relics of the Franklin Expedition Garth Walpole 2017-01-11 Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels, 129 men and three years' worth of provisions. None were seen again until nearly a decade later, when their bleached bones, broken instruments, books, papers and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own--photographed, analyzed, cataloged and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs, many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px 'Times New Roman'}

North Star Richard S. Wheeler 2009-12-29 There is a season for all things. . . For Barnaby Skye, legendary guide and man of the borders, it is time to start a new life. For Skye's younger wife, the beautiful Shoshone woman he calls Mary, it is time to find the beloved son she has not seen in seven years. For Skye's half-blood son, North Star, it is time to discover who he is. And for Skye's older Crow wife, Victoria, the whole world is spinning out of control. In this sweeping novel of the early West, Skye and his wives and son cope with radical change as the wilderness vanishes, the buffalo are slaughtered, and the government puts the tribes on reservation lands. How can people born and bred to tribal life learn to live another way? Their struggle takes the Skyes from the Crazy Mountains in Montana to St. Louis and the Wind River Reservation in Wyoming, wrestling with the tide of settlers and the new settlements that dot the western plains and mountains - a tide that leaves no good place for a veteran borders man with two Indian wives and a mixed-blood son.
