[Mission, Science, and Race in South Africa Keith Snedegar 2015-09-17](#) This book examines the cultures of colonial science, missionary education, and racial politics in South Africa through the life of A. W. Robert, a key participant in all three fields. This study gives insight into the porous nature of categories such as missionary evangelism, research in the physical sciences, and racial politics, which are traditionally segregated from one another in historical discourse.

[Systematic Theology : Volume II \(Illustrated\) Augustus Hopkins Strong 2014-04-03](#) "The Christ in whom are hid all the treasures of wisdom and knowledge himself furnishes all the needed safeguards and limitations. It is only because Christ has been forgotten that nature and [pg viii]law have been personified, that history has been regarded as unpurposed development, that Judaism has been referred to a merely human origin, that Paul has been thought to have switched the church off from its proper track even before it had gotten fairly started on its course, that superstition and illusion have come to seem the only foundation for the sacrifices of the martyrs and the triumphs of modern missions. I believe in no such irrational and atheistic evolution as this. I believe rather in him in whom all things consist, who is with his people even to the end of the world, and who has promised to lead them into all the truth."

[Selection of Reports and Papers of the House of Commons 1836](#)

[Miscast Pippa Skotnes 1996](#) In this book, eminent scholars explore the term 'Bushmen' and the relationships that gave rise to it, from the perspectives of anthropology, archaeology, comparative religion, literary studies, art history and musicology. Topics as diverse as trophy heads and museums, to the destruction of the Cape San, and appraisals of 19th-century photographic practices are examined.

[Studies on Large Branchiopod Biology and Conservation Marie A. Simovich 2013-04-17](#) This volume is a collection of papers concerning the biology of large branchiopod crustaceans: Anostraca, Conchostraca, and Notostraca. Many of the individual papers were first presented at the Third International Large Branchiopod Symposium (ILBS-3) held at the University of San Diego, CA, USA, July 15-18, 1996. Contributions on additional topics from participants at the symposium, and from colleagues not able to join us in San Diego, are also included. In addition, there is a supplement to the 1995 'Checklist of the Anostraca'. The theme of the ILBS-3 was 'understanding and conserving large branchiopod diversity'. Researchers from around the world presented papers on a variety of topics related to conservation of large branchiopods, with contributions ranging from alpha-taxonomy and zoogeography to community structure and studies of ecology and evolution. One important issue developed in many of the papers in this volume is the need to advance our understanding of basic aspects of branchiopod biology throughout the world in order to enhance our efforts to conserve them. Although we have made important strides in understanding the biology of large branchiopods, we have, with few notable exceptions, made little progress in assuring the conservation of their diversity. We hope this volume will supply the reader with new ideas, and generate enthusiasm for research and public education efforts on behalf of branchiopod conservation.

[Parliamentary Papers Great Britain. Parliament. House of Commons 1855](#)

[Systematic Theology: Volume II - The Doctrine of Man Augustus Hopkins Strong 2017-04-09](#) This volume starts off by ending the last part of the first volume and then going into the human doctrine that is taught in the Bible. Such topics such as the nature of humanity, the nature of sin and what makes up the image of God within us is the bulk of the topics that are covered within this work. Finishing off is some talk on the doctrine of the work and office of Christ and the topic of salvation and how that works out theologically.
