Four Portraits, One Jesus Workbook Mark L. Strauss 2015-08-04 This workbook accompanies Mark L. Strauss's

Four Portraits, One Jesus. Following the textbook's structure, it offers readings from the Gospels, activities, and

exercises designed to support the students' learning experience and enhance their comprehension of what can

be known from the Gospels about the central defining subject of Christianity, Jesus of Nazareth. Four Portraits,

One Jesus is a thorough yet accessible introduction to the four biblical Gospels and their subject, the life and

person of Jesus. Like different artists rendering the same subject using different styles and points of view, the

Gospels paint four highly distinctive portraits of the same remarkable Jesus. With clarity and insight, Mark

Strauss illuminates these four books, first addressing their nature, origin, methods for study, and historical,

religious, and cultural backgrounds. He then moves on to closer study of each narrative and its contribution to

our understanding of Jesus, investigating things such as plot, characters, and theme. Finally, he pulls it all

together with a detailed examination of what the Gospels teach about Jesus' ministry, message, death, and

resurrection, with excursions into the quest for the historical Jesus and the historical reliability of the Gospels.

Foundation Studies Courses In Anthroposophy Conrad Rehbach 2013-03-13 The purpose of this workbook is to give individuals and groups interested in studying the fundamental ideas of Anthroposophy a helpful guide for

their journey. Due to the massive amounts of reading material readily available today, the human mind wants to be: - Quickly attracted - Easily organized - Deeply engaged. I imagine individuals who reside in places where Anthroposophical studies are not readily available, to use this book as a basis for their studies. I imagine study groups that formed through a common interest in Anthroposophy to use this book as a guide to forming a temporary learning community.

The Well-Trained Mind: A Guide to Classical Education at Home (Fourth Edition) Susan Wise Bauer 2016-08-09

Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. *The Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized

testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.
