Robert Kliegman, Bonita Stanton, Richard Behrman, and two new editors—Drs. Joseph St. Geme and Nina Schor—continue to provide the most authoritative coverage of the best approaches to care. This streamlined new edition covers the latest on genetics, neurology, infectious disease, melamine poisoning, sexual identity and adolescent homosexuality, psychosis associated with epilepsy, and more. Understand the principles of therapy and which drugs and dosages to prescribe for every disease. Locate key content easily and identify clinical conditions quickly thanks to a full-color design and full-color photographs. Stay current on recent developments and hot topics such as melamine poisoning, long-term mechanical ventilation in the acutely ill child, sexual identity and adolescent homosexuality, age-specific behavior disturbances, and psychosis associated with epilepsy. Tap into substantially enhanced content with world-leading clinical and research expertise from two new editors—Joseph St. Geme, III, MD and Nina Schor, MD—who contribute on the key subspecialties, including pediatric infectious disease and pediatric neurology. Manage the transition to adult healthcare for children with chronic diseases through discussions of the overall health needs of patients with congenital heart defects, diabetes, and cystic fibrosis. Recognize, diagnose, and manage genetic conditions more effectively using an expanded section that covers these diseases, disorders, and syndromes extensively. Find information on chronic and common dermatologic problems more easily with a more intuitive reorganization of the section.

Explaining Reading, Third Edition Gerald G. Duffy 2014-05-01 This trusted teacher resource and widely adopted text

presents effective ways to demystify essential reading skills and strategies for K-8 students who are struggling. It has been fully revised to focus on the Common Core State Standards (CCSS) for English language arts. Following a concise introduction to the CCSS and explicit teaching, 30 engaging examples show how to be explicit when teaching each Literature, Informational Text, and Foundational Skills standard. Grounded in authentic reading tasks that teachers can adapt for their classrooms, the examples guide teachers to differentiate instruction, model and scaffold learning, assess student skills, and align reading instruction with Common Core writing standards. New to This Edition *Significantly revised and restructured with a CCSS focus. *The teaching examples are all new or revised. *Provides practical ways to develop "close reading" of text. *Incorporates recent research on authentic tasks and adaptive teaching.

Research Anthology on Developing Effective Online Learning Courses Management Association, Information Resources 2020-12-18 In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.

Second Language Learning and Language Teaching Vivian Cook 2016-05-05 Second Language Learning and Language Teaching provides an introduction to the application of second language acquisition research to language teaching.

Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language, such as grammar, vocabulary, pronunciation and the writing system, and at the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context – the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching.

Readings cover both general words and academic subjects. 4-color visual design, which links visual clues with words facilitates vocabulary acquisition. Interactive exercises give readers an opportunity to play with words and put them into personal contexts to facilitate learning. Each progressive reading uses previously presented vocabulary words in a new context giving readers numerous contact with new words. Flashcards are located at the end of the book for practice. For anyone interested in developing their vocabulary.

Multilingual Perspectives in Geolinguistics: 2nd Edition Hikaru Kitabayashi 2015 Multilingual Perspectives in Geolinguistics: 2nd Edition is a publication of the American Society of Geolinguistics, created with the active participation of its Japanese membership. The 2nd edition is a significantly expanded version with new chapters contributed by special request of the editorial staff. The editors-in-chief are Professor Wayne Finke of Baruch College (City University of New York) and Professor Hikaru Kitabayashi of Daito Bunka University. The object was to offer potential readers a more complete introduction to current literature dealing with geolinguistic themes than was the case with the first edition with Geolinguistics being defined as the study of languages and varieties of language in contact and/or conflict. This 2nd edition also contains many small corrections to the original text and it is to be hoped that it will offer a more satisfying experience than was possible with the first edition, which due to its historical interest is being kept in print for the time being.

A comprehensive answer key, and phonemic transcriptions to help with pronunciation, make it perfect for self-study as well as for use in the classroom. This book is designed for students at good intermediate level and above, and is also useful for those preparing for IELTS and university entrance examinations.

Foreign Language Learning with Digital Technology Michael Evans 2009-02-07 While digital technology is endlessly innovating and improving itself as a tool to support teaching and learning, the cognitive process of language learning itself remains perennially the same. However, digital technology has created new learning opportunities and introduces new elements into the cognitive process of foreign language learning. The contributors of this well-edited collection examine foreign language learning primarily from a user perspective and explore these underlying questions: How does digital technology support existing foreign language learning needs and processes? What new learning experiences does it entail for the learner? The book situates new insights into the value of digital technology for foreign language learning within the context of evidence from prior research and of educational policy-making and examines key pedagogical uses of digital technology in relation to effective foreign language learning by pupils. It provides an in-depth description of the use of a range of digital media and combines practical ideas for teaching and learning with critical analysis of evidence drawing on an analysis of technology-focused language learning across different sectors and in different anglophone contexts.

The Education of d/Deaf and Hard of Hearing Children Peter V. Paul 2020-02-12 A significant number of d/Deaf and hard of hearing (d/Dhh) children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States (and elsewhere). To provide an understanding of this issue, this book explores the theoretical underpinnings and synthesizes major research findings. It also covers critical controversial areas such as the use of assistive hearing devices, language, and literacy assessments, and inclusion. Although the targeted population is children and adolescents who are d/Dhh, contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language. Collectively, this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students. It is clear that there is not a 'one-size-fits-all' concept, but, rather, research and instruction should be differentiated to meet the needs of d/Dhh students. It is our hope that this book stimulates further theorizing and research and, most importantly, offers evidence- and reason-based practices for improving language and literacy abilities of d/Dhh students.

Handbook of Research on Emerging Practices and Methods for K-12 Online and Blended Learning Heafner, Tina Lane 2019-01-11 National efforts have been made to encourage technology integration in teacher preparation with expectations for frequent and successful applications with K-12 learners. While online learning has become pervasive in many fields in education, it has been somewhat slow to catch on in K-12 settings. The Handbook of Research on Emerging Practices and Methods for K-12 Online and Blended Learning is a collection of innovative research on the applications of technology in online and blended learning environments in order to develop quality courses, explore how content is delivered across disciplines and settings, and support the formation of relationships and enrichment opportunities. While highlighting topics including learning initiatives, institutional policies, and program structures, this book is ideally designed for teachers, principals, early childhood development centers, university faculty, administrators, policymakers, researchers, and practitioners.

Intelligent Testing with the WISC-V Alan S. Kaufman 2015-12-29 Interpret the WISC-V to help diagnose learning disabilities and to translate profiles of test scores to educational action The Wechsler Intelligence Scale for Children—Fifth Edition (WISC-V) is a valuable tool for assessing children and adolescents with learning disorders—and Intelligent Testing with the WISC-V offers the comprehensive guidance you need to administer, score, and interpret WISC-V profiles for informing diagnoses and making meaningful educational recommendations. This essential resource provides you with cutting-edge expertise on how to interpret the WISC-V, which has an expanded test structure, additional subtests, and an array of new composites. Intelligent Testing offers valuable advice from experienced professionals with regard to clinically applying the WISC-V in an effort to understand a child's strengths and weaknesses—and to create a targeted, appropriate intervention plan. Ultimately, this book equips you with the information you need to identify the best theory-based methods for interpreting each child's profile of test scores within the context of his or her background and behaviors. Intelligent Testing provides a strong theoretical basis for interpreting the WISC-V from several vantage points, such as neuropsychological processing theory and the Cattell-Horn-Carroll (CHC) model, yet it permits you to interpret children's profiles using simple, straightforward steps. The most frequently used IQ test in the world, the WISC-V (like previous versions of the WISC) plays an integral role in evaluating children for learning and intellectual disabilities, developmental and language delays, and gifted and talented classifications. As such, understanding how to use the latest version of WISC is extremely important when assessing children and adolescents ages 6 to 16 years. Explore all aspects of both the conventional WISC-V and WISC-V Digital Read objective, independent test reviews of the WISC-V from independent, highly-respected expert sources Review 17 clinical case reports that spotlight experiences of children and adolescents referred to psychologists for diverse reasons such as reading problems, specific learning disabilities, ADHD, intellectual giftedness, and autistic spectrum disorders Learn how a broad-based, multi-faceted approach to interpretation that calls upon several scientific concepts from the fields of cognitive neuroscience, clinical and school neuropsychology, neuropsychological processing, and the CHC model, can benefit children by providing meaningful recommendations to parents, teachers, and often to the children and adolescents themselves Use the results of WISC-V as a helping agent to assist in creating the best intervention plan, rather than allowing test results to dictate placement or labeling Intelligent Testing with the WISC-V is an indispensable resource for professionals who work with the WISC-V, including school psychologists, clinical psychologists, educational diagnosticians, and more.

Teaching Reading Comprehension to Students with Learning Difficulties, 2/E Janette K.
