Success at IELTS Speaking Test Vishal Choudhary 2017-09-16 This course is based on my experiences with training hundreds of students for IELTS tests, I realized that a lot of students often face challenge with IELTS speaking test, A large number of students who are good in English communication also faced difficulty with speaking test as they were not prepared enough for each question. Thorough study of this book should not take more than four hours for a student; however in

four hours the student can improve his/her score by at least 1.5 bands in speaking test. Going through this book in details will help one reduce the pauses or thinking time, help you to answer a question without sounding repetitive and will add better vocabulary to your speech. Let us all be aware that a lot of questions are common or similar in nature in speaking test and it would be wise for the student to come up with the most suitable and accurate answer, rather than giving a too lengthy or too short an answer. Let us all keep in mind that we are allowed only a limited period of time to answer each question. That is the reason we must be prepared well in advance to ensure our answers are to the point that is crisp and precise, we also have to let the examiner understand that we use a wide range of vocabulary and are not repetitive. We must keep in mind that being repetitive or taking too many pauses can reduce our chances of getting a higher band. I am happy to present this book to you all, so that you can see what are commonly asked questions and what could be a better answer to the question this will definitely help you in scoring desired band in IELTS Speaking test. This book presents you with 160+ commonly asked questions in IELTS speaking test and their suggested answers, the answers have been presented in a manner that the Examiner will understand your depth in knowledge of English Language. I strongly recommend my students to read each question think of a possible answer that they want to give and then read the answer that has been shared here, this will help you prepare an accurate answer for the expected question. As a bonus I have also added a list of Power words, words that can replace simple words and may help you in getting a better band. This book also has a list of Idioms and phrases, we must remember that use of better Vocabulary and Idioms and phrases will help you in both Speaking as well as Writing tests. What Can a Student Expect to Learn? Students will be able to enhance their knowledge, gain confidence in presenting answers to questions in IELTS Speaking test.? You will learn how to construct and give the most accurate answer for questions.? You will be able to maximize their chances of getting a high score in IELTS speaking test. ? You will be able to construct and present an answer even if they don't know much about the topic.? You will be able to use advanced vocabulary and synonyms? You will be able to deal with

difficult questions? You will be able to present your ideas and connect it to the question asked

Be Period Positive : Reframe Your Thinking and Reshape the Future of Menstruation Chella Quint 2021 "Period positivity starts with asking questions. This informative, irreverent, and absorbing book covers all your period-related questions - why they're taboo (and needn't be) and how to navigate the whole bleeding thing, from first periods to fertility, euphemisms to uteruses, menstrual products to menopause. Period Positive movement founder and menstrual researcher Chella Quint's answers are frank, funny, and fascinating. Let's get period positive. It's about bloody time"--Publisher's description.

I've Got My Period. So What? Clara Henry 2017-08-15 Your period. What is it, really? And why is it so embarrassing to walk to the bathroom hiding a tampon in your sleeve? Comedian and Scandinavian YouTube sensation Clara Henry has the answers to all your burning questions about bleeding. Have you always wondered what menstruation is, why it causes terrible cramps, or why it makes you want to do nothing but eat chocolate and watch cute cat videos? Have you been shocked that it's taboo to talk about something that half the world's population goes through every month? And above all, have you been looking for the best snarky response to the question "Are you on your period, or what?" Whether you're expecting your first period, have already gotten it, or know someone close to you who's

just begun the torment, this funny and informative book will tell you everything you need to know. In a funny, powerful, and entertaining voice, this book covers important terms, types of sanitary protection, and the history of menstruation and women's fight for equal access to reproductive healthcare. And if you suddenly find yourself hankering for chocolate or cute animals? Well. Welcome to the period club.

[Design and Implementation of QA Robots Based on Deep Learning Techniques](#)

Yi-ching Shan 2020 Whenever people encounter something they don't understand, the first thought usually is to find someone who knows about it to ask or to search on the Internet. Especially when they encounter something deeper and more delicate in the professional field, it is unavoidable to ask a large number of questions to cover the gap of knowledge. To solve this problem and answer questions more efficiently, QA robot is designed for this purpose. This thesis takes the QA on campus affairs of Tamkang University as an example, to design a AI QA robot, aiming at using AI technology to intelligently help improve the efficiency of campus QA, and make campus QA automated and reduce personnel costs. The method is to input campus related questions from users, and the system will automatically output the answers to the questions. There are four main groups on the campus: students, parents, professors and staff. They usually have things they want to know about the campus, and the pipeline of their aspirations usually needs to contact each place on the campus by phone to get relevant information. However, there are so many places on the campus that you may not know where to ask specific questions, which leads to inefficient problem solving. Moreover, if the questions are too complex and the staff are not experienced enough, the user's questions will not be answered. It takes a lot of time to answer user's questions. Such a huge time cost will directly affect the operation of the school and the efficiency of the work everywhere. This means school needs to try to effectively reduce the time cost and make accurate answers to users. Traditional QA robots often encounter some difficulties, the traditional way will use the word breaker and extract keywords then output the most probable answer. This method is limited to judging only the keywords that exist in the data but not the new words. However, modern deep learning uses the method of classifying first, then comparing word vectors, but it is still unable to understand the true meaning of the question as well as the diverse questions corresponding to the users. Recently, due to the maturity of artificial intelligence related technology and the breakthrough of natural language processing, this thesis is based on the latest artificial intelligence technology, which uses three deep learning neural networks to solve two long-standing problems in QA system, which is:(1) Traditionally, answers are

usually output directly only by comparing user questions to dataset questions, without considering that the questions may be from different domain categories, resulting to response incorrect answers (2) only by extracting words from user questions that are more likely to be keywords for comparison. For the above two fatal questions, this thesis implements a campus QA system through multi-level detailed processing, which is divided into training period and usage period: During the training period, the existing question and answer sets on the campus are preprocessed. After identifying the unequal classification of the problems, the data with fewer categories is added to help make the data more balanced by manufacturing extended questions. After confirming that the data is balanced, use the campus data as input and train the BERT classifier to be able to distinguish the range of user problems. The classifier can solve the above mentioned problem (1). After that, we further trained the BERT keyword extraction to find out the user's core intentions. Finally, we trained the BERT semantics model to compare the user's question with the most likely question in the campus question and answer set. The semantics model can handle the above mentioned question (2), and solved the problem of taking user's question out of context. When it gets to using period, analyze the user's problem by BERT classification, BERT keyword extraction to narrow down the scope, and finally by cosine similarity, Fuzzy-Wuzzy comparison and BERT semantics model help to discover user's intentions and find answers of it. Through the way of additional candidate questions, it can also output related questions that users want to ask further, thus completing campus question and answer in an automated and intelligent way. In the experimental phase, user's practical questions are used to confirm the responsiveness of the system, and compared with traditional methods, it is easy to understand the advantages and disadvantages of the system. In addition to improve the management of school time costs, this system is also helpful for the training of new recruits, so that schools can more effectively solve the campus QA business.
