Webparentheses, brackets, and braces. First, students use these symbols with whole numbers. Then the symbols can be used as students add, subtract, multiply and divide decimals and fractions. Examples: •  $(26 + 18) 4$  Solution:  $11 \bullet 12 - (0.4 2)$  Solution: 11.2

### Georgia Standards of Excellence

WebHigh school students start to examine problems by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt.

### Grade 4 Mathematics Instructional Focus Documents

Web31-07-2019 · In grade 3, students solved two-step contextual problems with all four operation. In grade 4, students build on these experiences to extend student thinking as they solve multi-step contextual problems using all four operations including for the first time problems in which remainders must be interpreted. Revised July 31, 2019 6
