Sands Point - Memoirs of a Money Trader B.K. Smith 2014-11-07 These are the new go-go years, the eighties, and money is plentiful—custom-made designer clothes, champagne cocktails at Windows on the World, limousines lined up in front of the trendiest restaurants and private clubs along Park Avenue. The WTC is a beacon and venue for money traders. The US dollar is strong and cash, as always, is king. It is a decade of fast cars, fast markets, and fast talkers. And then the music stops. The yield curve is inverted, S&Ls are insolvent, OPEC is a dangerous cabal, Petrodollars and Eurodollars are flooding the financial markets, and countries are defaulting on loans. Billions of dollars disappear from the Vatican Bank, and the bank chairman, Roberto Calvi, is found "suicided" under the Blackfriars Bridge in London in 1982. Meg is an aspiring actress, married to Dick, a struggling director. They live over a deli in a walk-up tenement on the eastside. What she dreams of is being married to a filthy rich man and shopping at couture salons on Madison Ave. Becky is writing a novel, living in Sands Point on Long Island, married to Kevin, a successful money market broker on Wall Street pre-9/11. She has everything a woman could want, except love. Alex is a middle-aged playboy who owns several businesses in town, drives a

sports car and fantasizes about both of these women—but he's married. They are all married. None happily. Is money the cause of all unhappiness—too little, too much, never enough—and is it the root of all evil? Meg, Becky, and Alex never suspect what is really going on and where they will ultimately end up. Can money manipulate their destinies? Or, is it fate? A novel of fast money, easy money, love, sex, betrayal, international scandal, embezzlement, and murder. A modern story of the profound and deadly effects of deception.

Auravana Habitat System Auravana 2022-07-12 This publication is the Habitat System for a community-type society. A habitat (a.k.a., city, town) is a material-operational service environment where humans live and have their needs fulfilled. It is a service composed of interacting material objects. This habitat system standard identifies the services, technologies, components, and processes that compose a habitat service system. A habitat service system encodes and expresses humanity's decided material fulfillment services. When a decision resolves into a service, that service is specified to exist in the habitat system. Different configurations of a habitat lead to different levels and qualities of fulfillment. The coherent integration and open visualization of the habitat system is important for human requirements to be met at the local and global level through scientific planning. This standard represents the encoding of decisions into a global habitat service system with many local configurations of habitat that act together as a fulfillment platform for the whole community population. The visualization and simulation of humanity's interconnected habitat systems is essential for maintaining a set of complex, fulfillment-oriented constructions and operations that meet human fulfillment requirements. This publication details

what has been, what is, and what could be constructed in the material environment. It depicts through language and symbols, visualization, and simulation, a habitat service environment consisting of life, technology, and exploratory support services. For anything that is to be constructed in the material system, there is a written part, a drawing part, and a simulation part, which is also how the material system is sub-divided. Further, all habitats are designed and operated by means of master planning; they all have a master plan.
