International Communications Strategy Silvia Cambié 2009-07-03 International Communications Strategy is about the cross-cultural challenges currently facing PR practitioners. Offshoring, globalisation and the rise of China and India have been triggering unprecedented change in the communication sector. New channels of global communications are also being opened up by social media tools, bringing different cultures across the world together instantaneously online. Understanding cross-cultural aspects of PR includes understanding the culture of different societies, online culture itself and cross-border uses of social media. Communication is seen less and less as an operational function. While in the past organizations seemed to need communication practitioners only for colourful brochures and press releases, you are now expected to provide strategic advice and help senior executives to engage effectively with stakeholders in various parts of the world. At the same time, you are required to be knowledgeable about social media and internet cultures and to be able to link on-line and off-line PR work successfully. By providing information on alternative approaches as well as containing cross-cultural case-studies and examples, the book will give you points of reference and ideas that you will be able to use every time you are asked to provide strategic communication guidance to senior management/clients.

Cooperative systems design requires a deep understanding of the cooperative work of groups and organizations, involving both artifacts and social practices. Contributions discuss topics such as: Analysis of collaborative work situations; Conceptual frameworks for understanding cooperative work; Guidelines for designing cooperative systems; The influence of new technologies (mobile computing, ubiquitous computing, etc.) on cooperation; Expertise sharing and learning in cooperative work; Communities and new forms of organization; Innovative technological solutions and user interfaces; and Methods for participatory design of cooperative systems. Special emphasis is on the issue of the 'seamless integration of artifacts and conversations enhanced concepts of infrastructure for communication'. The emergence and distribution of cooperative systems has been accompanied by an increased communication workload. This is characterized by increased information exchange, message overflow, numerous interruptions of work, cognitive overload, or a dominance of virtual context. To alleviate and improve the situation, greater integration of conversational acts (e.g. message exchange) and documents is clearly required. "

Figuring Age Kathleen M. Woodward 1999 Figuring Age engages the virtually invisible subject of older women in western culture. Like other markers of social difference, age is given meaning by a culture. Yet unlike gender and race, the subjects of age and aging have received little sustained attention. Central to Figuring Age is the crucial question of how women are aged by culture. How are older women represented in a visual culture that is dominated by images of youth in television, film, and life performance? How do psychoanalysis, rejuvenation therapy and hormone replacement therapy, the fashion system, cosmetic surgery, and midlife bodybuilding shape our views of aging as well as of the older body itself? What is the "timing" of aging? To what extent is aging a culturally-induced trauma?
