A Semiempirical Life Michael James Steuart Dewar 1992 This volume is an autobiography of Michael Dewar, eminent developer of the semi-empirical method of theoretical/computational chemistry. The personality and charm of this bold, brilliant and frequently brash scientist is vividly demonstrated in his stories, ranging from his early discovery of the structure of colchicine by analysis of literature data to his application of theoretical chemistry to numerous questions of chemical structure and reactivity. Dewar describes his childhood in India, his studies in Oxford in the 1940's, and his subsequent Professorships in England and at the University of Chicago and the University of Texas.

The Public and Preparatory Schools Year Book 1981

Incidents in an Educational Life John M. Swales 2009-05-27 divdivIncidents in an Educational Life chronicles the educational journey of John M. Swales. A leading scholar in the field of Applied Linguistics and its subfield of English for Specific Purposes, Swales has taught across the globe in places such as Italy, Sweden, Libya, the United Kingdom, and the University of Michigan. His memoir offers a rare glimpse into the professional journey of a prominent scholar and educator. /DIV div /DIV divIncidents in an Educational Life explores the lessons Swales learned by teaching and by being taught. The story follows his gradual transformation from an English as a Second Language teacher to one of the leading international figures in his field, stopping along the way to tell the sometimes amusing, sometimes painful anecdotes that have made him the recognized educator he is today. His entertaining prose make this volume a must-read for anyone considering the field, or the many ways in which we all become teachers. /DIV div /DIV divJohn M. Swales is one of the leading international scholars in the field of English for Specific Purposes. He retired in the summer of 2006 from the University of Michigan after teaching at multiple universities overseas. He is the co-author of the international bestseller Academic Writing for Graduate Students (3rd ed.). /DIV/DIV

The Ecclesiastical gazette, or, Monthly register of the affairs of the Church of England 1874

A Cyclopedia of Education Paul Monroe 1911

The Englishman John Staddon 2016 "Although I have been basically an academic for most of my life, the way I got there has taken some surprising turns. The first four chapters of this memoir describe what I can remember and discover about my early life: an unsuspected ancestry, fun in WW2 London, comical schooldays, and a spell in colonial Africa interrupting a wobbly college career at the end of which I left England for America. In the US I followed again a slightly erratic graduate-school trajectory that ended up in a Harvard basement." This is not just a witty transatlantic autobiography from a talented English working-class kid who made his name in the USA but also a learned and entertaining romp through the subject he has made his own. Growing up in a modest odd family out in wartime England, and with a natural resistance to regimentation, John Staddon was the precocious self-driven polymath who first studied chemical engineering but switched to psychology because there were only four or five classes a week. By way of his wide-ranging interests in biology, artificial intelligence, economics, philosophy and behavioural neuroscience, John Staddon introduces his important work on how animals learn. He discusses the still relatively new and exciting field of behavioural psychobiology, explains theoretical research on choice and interval timing and debates so-called superstition in the learned behaviour of pigeons, rats, fish - and people. Here is a most entertaining life story interwoven with expansive thoughts across the marvellously wide spectrum of behavioural psychology.
